Attach the bracket for wood using a clamping strap.

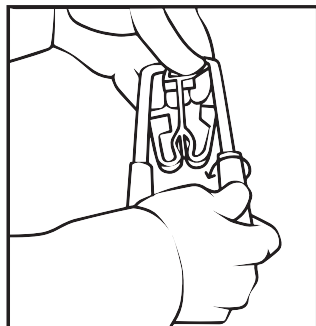

Mounting shower head in a bracket.

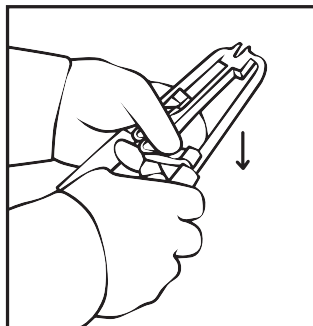

PEDAL INSTALLATION

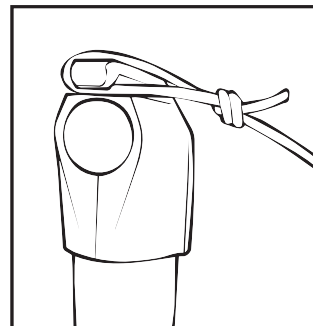

1) Slide out the two sliding sleeves,

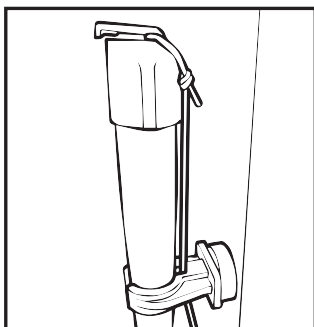

2) turn the sliding sleeves several times until the holes are completely exposed,

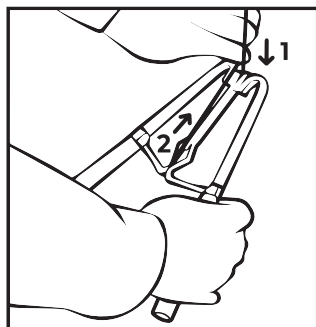

3) on the exposed holes press the middle branches of the pedal.

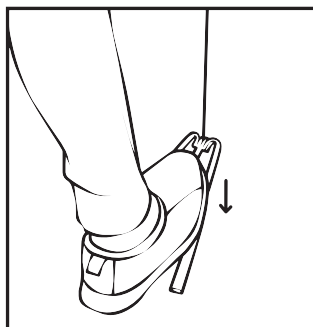

4) Hook the loop from the cord on the upper part of the empty valve and then apply the long nozzle,

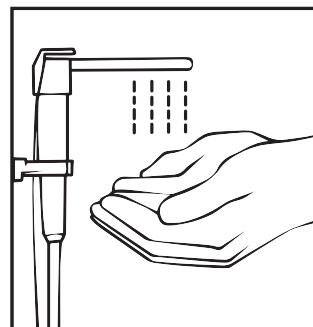

5) insert the shower head into the bracket so that the cord is placed in the recess of the bracket,

6.1) put the cord through the upper recess in the pedal
6. 2) set the length of the cord by inserting it between two narrow plates in the middle part of the pedal. Wrap the rest of the cord using the same hitch points.

7) Press the pedal to start touchless water flow.
